### Subject Index

Absorption of L-valine and D-glucose dissolved in sea water by larvae and post-larvae of the brown shrimp, *Penaeus aztecus* (Lawrence) 106 (abstr.)

Abstracts of papers—second joint microscopy symposium Louisiana and Texas societies for electron microscopy 249–269

Acid decarboxylase, L-glutamic (GAD I), product inhibition of (Haber) 311

Adrenal cortical cells, alterations in the fine structure of rat, following inhibition of corticosteroidogenesis (Laury et al.) 258 (abstr.)

Adrenal medullary cells in the syrian hamster, fine structural comparisons between paraganglion and (Mascorro and Yates) 519

Adrenergic nerve vesicles, highly purified: early post-mortem effects on ultrastructure (Thureson-Klein et al.) 267 (abstr.)

Adrenergic reception in the air-sac of the gar, lepisosteus, cholinergic and (Perry and Burch) 105 (abstr.)

Aldosterone biosynthesis, selective inhibition of induced, with a specific antagonist of angiotensin II (Chiu and Peach) 561 (abstr.)

Aminoplastics as highly polar, water-containing embedding media (Pease) 263 (abstr.)

Amphetamine, the effect of D—, sulfate on susceptibility to audiogenic seizures in DBA/2J and C57BL/6J mice (Graham et al.) 570 (abstr.)

Amygdaloid nucleus and olfactory bulb via blockage of nasal air flow, inhibition of the 40 Hz activity of the (Shulman and Holmes) 598 (abstr.)

Amyloid in the gastrointestinal tract of mice—an electron microscopic study (Yates et al.) 89

Anesthesia, silent regurgitation during general (Clark et al.) 561 (abstr.)

Anesthetic, a new dissociative, operant behavior and neurophysiological observations of normal human volunteers receiving CL-1848C (Wilson et al.) 239

Anesthetics, the effect of, on non-polar compound solubility in water (Buffington) 557 (abstr.)

Annulate lamellae during grasshopper spermatogenesis, the presence of (Pool and Hoage) 263 (abstr.)

Antibodies: distribution of the VHII subgroup among several mammalian species (Wasserman et al.) 604 (abstr.)
